LINEA COMPLETA DI SALDATURA E PULITURA, automatica e robotizzata composta da:

- Saldatrice a quattro teste in quadrato **SQ4L**;
- Fresatrice scarico acqua **145LM-E**
- Pulitrice a controllo numerico **PA2CNC Radius**.

Per il trasferimento tra le stazioni di lavoro, tra saldatrice e la fresatrice è presente un traslatore, mentre tra quest'ultima e la pulitrice vi è un traslatore rotativo che gestisce il quadrato saldato fino allo scaricatore, da dove, autonomamente, il telaio viene spostato sui carrelli di magazzino automatici.

Ogni carrello ha una capacità di 15 telai.

COMPLETE WELDING AND WELDING MACHINE, automatic and robotized composed of:

- Four-head welding machine in square **SQ4L**;
- **145LM-E** water discharge milling machine
- **PA2CNC Radius** robotise corner cleaning.

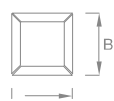

For the transfer between work stations, from the welding machine to the milling machine there is a translator, while between the water discharge milling machine and the corner cleaner there is a rotary translator that manages the square welded up to the unloader, from where, automatically the frame is moved on automatic warehouse trolleys.

Each trolley has a capacity of 15 frames.
